

INDIA AI VALUE CHAIN

COMPREHENSIVE STOCK REPORT

2026 EDITION

Track India's AI Revolution Across the Entire Value Chain

~30 Companies | All Cap Sizes | 8-Rule Evaluation Framework

AI Infrastructure	Semiconductors	IT/Cloud AI	AI Applications	Telecom AI	Defence AI
-------------------	----------------	-------------	-----------------	------------	------------

TREND

+

VOLUME

+

STRUCTURE

=

**HIGH PROBABILITY
SETUP**

Every company in this report is scored 1–5 on each of the 8 rules. The scores are qualitative assessments based on fundamental AI positioning, historical chart behavior, and sector dynamics. **Technical scores (Uptrend, Volume, Structure, Entry) must be verified with real-time charts before acting.** The framework follows the principle: *Trend + Volume + Structure = High Probability Setup*.

#	Rule	Criteria	Score Key
1	Only Buy in Uptrends	EMA 8 > EMA 21 Price above moving averages No trend = no trade	5=Excellent 4=Good 3=Neutral 2=Weak 1=Poor
2	Volume Must Confirm	Breakout with strong volume Higher-than-average participation Weak volume = weak conviction	
3	Never Chase Extended	Avoid stocks far from support Wait for proper entries Focus on low-risk setups	
4	Strong Themes Only	AI Defence EV Energy Capital inflow sectors	
5	Clean Chart Structure	Flags VCP Cup & Handle Flat Bases Avoid messy charts	
6	High Relative Strength	Stock outperforming Nifty 50 Strong momentum only Avoid weak performers	
7	Good Liquidity	High daily volume Easy entry & exit Avoid illiquid traps	
8	Enter Only on Strength	Breakout entry Gap-up continuation Confirmation before buying Never buy randomly	

●●●●● 5 –
EXCELLENT

●●●● 4 – GOOD

●●● 3 – NEUTRAL

●● 2 – WEAK

● 1 – POOR

Disclaimer: Scores are qualitative research guidance, not buy/sell signals. Always verify with up-to-date charts, financials, and your risk management rules before investing.

The AI value chain spans from raw hardware and semiconductors all the way to consumer-facing applications. India is positioned across multiple layers, making it one of the most diverse AI investment landscapes in Asia.

Value Chain Layer	AI Activities	Key Companies Covered
LAYER 1 Hardware & Infrastructure	AI Data Centers, Optical Fiber, Networking, Power Infrastructure	Adani Enterprises, Tata Comms, Tejas Networks, Sterlite Tech
LAYER 2 Semiconductors & EMS	Chip Design, Electronics Manufacturing, OSAT, PCB Assembly	Dixon Technologies, Kaynes Technology, Tata Elxsi, Moschip, Cyient DLM
LAYER 3 Cloud & IT AI Services	GenAI Services, Cloud AI, AI Product Engineering, AI Testing	Persistent, Coforge, Tech Mahindra, LTIM, Mphasis, Happiest Minds, Latent View
LAYER 4 AI Applications	FinTech AI, HR AI, Food/Commerce AI, BPM AI, AdTech AI, TravelTech AI	Zomato, Naukri, Affle, Newgen, Intellect Design, RateGain
LAYER 5 Telecom AI Enablers	5G AI Delivery Networks, Enterprise AI Pipes, Edge AI	Bharti Airtel, Reliance Industries
LAYER 6 Defence AI	AI Radar, Counter-Drone AI, Military Simulation AI, Space AI	BEL, Zen Technologies, Data Patterns, MTAR Technologies

AI INFRASTRUCTURE & DATA CENTERS

The physical foundation of AI — data centers, networking, fiber optic cables, and power infrastructure. India is investing massively in building sovereign AI infrastructure to serve both domestic and global hyperscaler demand.

Adani Enterprises (ADANIENT NSE)		Large Cap ~₹2,00,000 Cr	WATCHLIST	AVG: 3.8/5																														
Business + AI Thesis India's largest new-business incubator. Building hyperscale AI data centers via Adani Connex (JV with EdgeConneX). Plans 1 GW+ of AI data center capacity. <i>Positioned as the physical backbone of India's AI infrastructure. Adani Connex targets hyperscaler demand from Google, Microsoft & Indian cloud companies. PLI data center scheme beneficiary.</i> Key Strengths ✓ India's largest planned AI data center buildout (1GW+) ✓ Strategic land bank near power grids ✓ Govt digital infra alignment Key Risks ■ High group-level debt remains a concern ■ Governance risk premium in market ■ Diversified conglomerate – not pure-play AI			<table><tr><th>Rule</th><th>Score</th><th>Rating</th></tr><tr><td>Uptrend</td><td>3</td><td>●●●■</td></tr><tr><td>Volume</td><td>5</td><td>●●●●●</td></tr><tr><td>Not Extended</td><td>3</td><td>●●●■</td></tr><tr><td>Strong Theme</td><td>5</td><td>●●●●●</td></tr><tr><td>Chart Structure</td><td>3</td><td>●●●■</td></tr><tr><td>Relative Strength</td><td>3</td><td>●●●■</td></tr><tr><td>Liquidity</td><td>5</td><td>●●●●●</td></tr><tr><td>Entry Signal</td><td>3</td><td>●●●■</td></tr><tr><td>OVERALL</td><td>3.8</td><td>●●●●■</td></tr></table>		Rule	Score	Rating	Uptrend	3	●●●■	Volume	5	●●●●●	Not Extended	3	●●●■	Strong Theme	5	●●●●●	Chart Structure	3	●●●■	Relative Strength	3	●●●■	Liquidity	5	●●●●●	Entry Signal	3	●●●■	OVERALL	3.8	●●●●■

Tejas Networks (TEJASNET | NSE)

Mid Cap
~₹8,000 Cr

WATCHLIST

AVG: 3.5/5

Business + AI Thesis

Indian optical & data networking product company. Supplies 5G and broadband equipment for BharatNet and commercial telecom. Tata Sons subsidiary.

AI data centers require massive optical bandwidth. Tejas provides India-made networking equipment reducing import dependency. 5G + AI infrastructure convergence play.

Key Strengths

- ✓ Tata backing + Atmanirbhar Bharat theme
- ✓ 5G BharatNet order momentum
- ✓ Import substitution tailwind in networking

Key Risks

- Order book concentration risk
- Scale gap vs Nokia / Ericsson

Sterlite Technologies (STRTECH | NSE)

Small Cap
~₹4,500 Cr

WATCHLIST

AVG: 2.8/5

Business + AI Thesis

End-to-end optical fiber cable manufacturer and digital network solutions provider. Exports fiber to 100+ countries.

Every AI data center and 5G deployment requires vast optical fiber infrastructure. STL is India's only integrated fiber + network company serving AI infra demand globally.

Key Strengths

- ✓ Secular global fiber demand from AI buildout
- ✓ End-to-end digital network capability

Key Risks

- High debt, undergoing balance sheet repair
- Margin pressure from competition
- Weak near-term chart trend

SEMICONDUCTOR & ELECTRONICS MANUFACTURING

India's semiconductor and electronics manufacturing ambitions are accelerating via PLI schemes and OSAT investments. These companies sit at the hardware layer of the AI stack — from chip design to device manufacturing.

Dixon Technologies (DIXON | NSE)

Large Cap
~₹70,000 Cr

BUY ON PULLBACK

AVG: 4.0/5

Business + AI Thesis
India's largest electronics manufacturing services (EMS) company. Manufactures smartphones, LED TVs, washing machines, and increasingly AI-enabled edge devices.
As AI moves to edge devices – AI phones, AI PCs, AI TVs, IoT – Dixon benefits directly from every unit shipped. Apple ecosystem entry and Samsung JV make it India's premier AI device manufacturer.

Key Strengths

- ✓ India's AI device manufacturing leader
- ✓ PLI tailwinds attracting large anchor OEM orders
- ✓ Apple ecosystem entry underway

Key Risks

- Thin EMS margins (2–4% PAT)
- Customer concentration risk
- Input commodity price sensitivity

Kaynes Technology (KAYNES | NSE)

Mid Cap
~₹16,000 Cr

BUY ON PULLBACK

AVG: 3.9/5

Business + AI Thesis
IoT-enabled electronics manufacturing services company building India's first OSAT (semiconductor packaging) facility with government support.
India's semiconductor ambitions converge at Kaynes. OSAT facility will domestically serve AI chip packaging demand. IoT + industrial AI hardware leader.

Key Strengths

- ✓ First Indian OSAT chip-packaging facility
- ✓ Strong aerospace + defence order book
- ✓ AI + Semiconductor + India PLI trifecta

Key Risks

- OSAT execution is capital-intensive and new
- Premium valuation prices in high growth
- Moderate daily liquidity

Tata Elxsi (TATAELXSI | NSE)

Mid Cap
~₹40,000 Cr

WATCHLIST

AVG: 3.8/5

Business + AI Thesis
Design and technology services for automotive, healthcare, and broadcast. Embedded software + AI/ML product engineering for global OEMs.
AI-embedded product design leader. Autonomous vehicle AI (SDV), medical AI imaging, connected home AI. GenAI product engineering growing. Premium design firm with software-like margins.

Key Strengths

- ✓ Premium AI product design moat
- ✓ SDV / Automotive AI dominant position
- ✓ ~27% EBITDA margins – software-like

Key Risks

- Auto sector cyclicity dampens growth
- Revenue concentration in top 3 clients
- Near-term growth headwinds persist

Moschip Technologies (MOSCHIP | NSE)

Small Cap
~₹1,200 Cr

SPECULATIVE

AVG: 2.9/5

Business + AI Thesis
Semiconductor IP and custom VLSI/ASIC design services company – one of India's very few listed chip design companies.
Rare Indian semiconductor IP play. Custom AI chip design, RISC-V implementations, VLSI services for AI edge processors. Nascent but high potential – potential acquisition target for global fabless firms.

Key Strengths

- ✓ Rare listed Indian chip design company
- ✓ AI chip design secular long-term opportunity
- ✓ Potential strategic M&A; target

Key Risks

- Very low daily liquidity (<₹3–5 Cr/day)
- Tiny scale vs global opportunity
- Execution track record still building

Cyient DLM (CYIENTDLM | NSE)

Small Cap
~₹5,000 Cr

WATCHLIST

AVG: 3.5/5

Business + AI Thesis

Design-led electronics manufacturing (DLM) for aerospace, defence, and medical. End-to-end PCB assembly and electronics for mission-critical AI-enabled systems.

Manufactures electronics for defence AI systems, medical imaging AI, aerospace AI. Triple tailwind: Defence + AI + Electronics Manufacturing with Cyient parent customer relationships.

Key Strengths

✓ Defence AI hardware manufacturing play

✓ Design-to-manufacture capability moat

✓ Cyient parent brings blue-chip client access

Key Risks

■ Low daily trading volumes

■ Niche market limits near-term scale

■ Strategic dependency on parent

IT SERVICES & CLOUD AI (LARGE CAP)

India's large IT services sector is pivoting aggressively to GenAI. These companies are building proprietary AI platforms, acquiring AI capabilities, and repositioning as AI-first digital transformation partners.

Persistent Systems (PERSISTENT | NSE)

Large Cap
~₹75,000 Cr

BUY ON DIP

AVG: 4.2/5

Business + AI Thesis
Mid-large IT company with industry-best revenue growth in Indian IT. GenAI practice contributes 15%+ to revenue. Ranked among top GenAI services providers globally.
GenAI product engineering leader. SASVA AI platform accelerates software development. Consistently outgrowing IT peers 25%+ CAGR. The closest India has to a pure-play AI services company at scale.

Key Strengths

- ✓ India IT sector's top revenue growth (25%+ CAGR)
- ✓ SASVA GenAI platform creates productivity moat
- ✓ Premium valuation justified by consistent execution

Key Risks

- Expensive at 60–70x PE – limited margin of safety
- BFSI + Hi-tech client concentration
- Sustaining growth at larger base is harder

Coforge (COFORGE | NSE)

Large Cap
~₹45,000 Cr

BUY

AVG: 3.9/5

Business + AI Thesis
Mid-large IT services company with aggressive AI/digital transformation focus. Strong in BFSI, travel, and insurance. CIGNITI acquisition strengthened AI testing capabilities.
Quicreate AI platform + CIGNITI AI testing create differentiated mid-market AI services offering. Strong deal wins momentum; improving margins; management credibility high.

Key Strengths

- ✓ Aggressive AI capability buildout via focused M&A;
- ✓ Improving deal momentum and order book
- ✓ Management credibility and execution track record

Key Risks

- Integration risk from multiple acquisitions
- BFSI sector dependency
- Margin management at growing scale

Tech Mahindra (TECHM | NSE)

Large Cap
~₹1,20,000 Cr

BUY ON PULLBACK

AVG: 4.0/5

Business + AI Thesis
Large-cap IT services undergoing TechM 2.0 transformation with AI at center. Unique 5G + AI convergence positioning. Strong telecom domain heritage.
TechM 2.0 strategy rebuilds company around AI. Unique intersection of 5G network AI and enterprise AI services. Significant margin expansion runway post-restructuring = multi-year upside.

Key Strengths

- ✓ Turnaround + AI-first strategy = strong re-rating potential
- ✓ 5G + AI unique vs all IT peers
- ✓ Significant margin improvement runway

Key Risks

- Execution risk in ongoing transformation
- Telecom client weakness persists
- Catching up vs Persistent/Coforge

LTIMindtree (LTIM | NSE)

Large Cap
~₹1,50,000 Cr

WATCHLIST

AVG: 3.9/5

Business + AI Thesis
Large-cap IT formed from LTI + Mindtree merger. Canvas AI platform for enterprise AI. Strong manufacturing sector AI expertise and deep client relationships.
Canvas AI integrated platform for enterprise AI. Post-merger integration completing; growth acceleration expected. Attractive relative valuation vs Persistent. Manufacturing + BFSI AI depth.

Key Strengths

- ✓ Canvas AI enterprise platform at scale
- ✓ Attractive valuation vs growth peers
- ✓ L&T; group governance and client access

Key Risks

- Integration challenges slowing growth recovery
- Sub-par relative strength vs IT peers
- Margin recovery taking longer than guided

Key Risks ■ DXC revenue concentration remains significant ■ Slower growth vs peers over 2023–25 ■ Needs to prove sustained revenue recovery																																		

IT SERVICES & CLOUD AI (MID/SMALL CAP)

Mid and small-cap IT companies often have more concentrated, specialized AI capabilities vs larger peers. Higher growth potential but also higher execution risk. Pure-play AI exposure with smaller scale.

Happiest Minds Technologies

(HAPPSTMNDS | NSE)

Small Cap

~₹8,000 Cr

WATCHLIST

AVG: 3.5/5

Business + AI Thesis

Born Digital, Born Agile IT services company. 100% digital-native revenue model. Founded by Ashok Soota; strong AI/ML and GenAI service capabilities.

Purpose-built AI-native IT company with no legacy drag. GenAI product engineering, AI-embedded cloud services, edge AI. High EBITDA margins (~22%) for size. Founder credibility = quality culture.

Key Strengths

✓ 100% digital/AI revenue – zero legacy overhead

✓ High margins (~22% EBITDA) for its size

✓ Founder credibility (Ashok Soota, ex-Wipro CEO)

Key Risks

■ Revenue growth deceleration since FY24

■ Small scale limits large-deal access

■ Founder succession planning uncertainty

Latent View Analytics (LATENTVIEW | NSE)

Small Cap
~₹5,000 Cr

WATCHLIST

AVG: 3.5/5

Business + AI Thesis

India's only listed pure-play data analytics and AI services company. Works with Fortune 500 companies on advanced analytics, ML models, and GenAI adoption.

Pure analytics/AI play with Fortune 500 client quality that larger peers can't match for deep data work. Cash-rich (zero debt), enabling future AI M&A.; GenAI advisory is fast-growing.

Key Strengths

- ✓ Only listed pure-play analytics/AI in India
- ✓ Excellent Fortune 500 client quality
- ✓ Cash-rich, zero debt balance sheet

Key Risks

- Revenue growth slowdown in recent quarters
- High client concentration (top 5 ~60% revenue)
- Small scale limits enterprise deal size

AI APPLICATIONS & PLATFORMS

Consumer and enterprise AI applications represent the highest visible AI impact. These companies use AI as a core competitive moat — from food delivery optimization to financial process automation.

Info Edge (Naukri) (NAUKRI | NSE)

Large Cap
~₹72,000 Cr

BUY ON DIP

AVG: 4.1/5

Business + AI Thesis

India's monopoly online recruitment platform (Naukri.com) plus real estate classifieds. Holds strategic stakes in Zomato, PolicyBazaar, and other AI-driven startups.

AI-powered recruitment monopoly + venture portfolio of AI companies within a listed stock. Naukri's AI matching algorithms grow in value as India's tech hiring booms. Startup portfolio = AI sector exposure.

Key Strengths

- ✓ AI-powered monopoly in Indian job recruitment
- ✓ Portfolio: Zomato, PolicyBazaar AI company exposure
- ✓ Strong cash generation + compounding moat

Key Risks

- Premium valuation (40–50x PE)
- Job market cyclicality impacts core revenue
- Core Naukri growth somewhat maturing

Zomato (ZOMATO | NSE)

Large Cap
~₹2,20,000 Cr

BUY ON DIP

AVG: 4.5/5

Business + AI Thesis

India's leading food delivery and quick commerce (Blinkit) company. AI drives delivery optimization, demand forecasting, personalization, and fraud detection at scale.

AI is the competitive moat: route optimization AI, demand forecasting AI, restaurant recommendation AI, fraud AI. Every transaction is AI-powered. Blinkit creates an AI-powered last-mile data flywheel.

Key Strengths

- ✓ AI as fundamental competitive moat across all operations
- ✓ Market leadership + profitability milestone achieved
- ✓ Blinkit quick commerce driving secular growth

Key Risks

- Very high valuation (100x+ PE, expensive)
- Swiggy / Instamart competition
- Unit economics of new verticals still evolving

BUY

AVG: 3.8/5

Business + AI Thesis
AI-powered mobile marketing and consumer intelligence platform. Proprietary CPCU (Cost Per Converted User) model. Serves 2B+ user devices across 30+ markets globally.
Pure AI platform: every consumer conversion decision is ML-driven. As mobile AI advertising grows in emerging markets, Affle's platform advantages compound with scale. Global expansion via acquisitions.

Key Strengths

- ✓ Proprietary AI platform with strong technology moat
- ✓ CPCU model aligns perfectly with advertiser ROI
- ✓ Growing global emerging market footprint

Key Risks

- High valuation (50–60x PE)
- Digital advertising spend cyclical risk
- Execution risk in international acquisitions

Intellect Design Arena (INTELLECT | NSE)

Mid Cap
~₹10,000 Cr

BUY ON PULLBACK

AVG: 3.5/5

Business + AI Thesis
AI-powered financial technology company. Cloud-native banking, insurance, treasury, and risk platforms for 270+ clients across 57 countries.
AI embedded in every BFSI module: risk AI, treasury AI, lending AI.
Composable AI banking is the future of financial services. Growing product licenses = strong operating leverage ahead.

Key Strengths

- ✓ Deep BFSI AI moat across 57 countries
- ✓ Composable AI banking architecture advantage
- ✓ Growing SaaS / subscription revenue transition

Key Risks

- Lumpy revenue recognition from large deals
- Long enterprise financial services sales cycles
- Moderate daily trading liquidity

RateGain Travel Technologies (RATEGAIN | NSE)

Small Cap
~₹5,500 Cr

WATCHLIST

AVG: 3.5/5

Business + AI Thesis
AI-powered travel technology SaaS. Revenue management, distribution, and marketing AI for hotels, airlines, OTAs, and car rental companies globally.
AI-powered revenue management is mission-critical for hotels/airlines.
Dynamic pricing AI + demand forecasting AI create high switching costs.
GenAI marketing copilot is new growth vector.

Key Strengths

- ✓ Niche AI SaaS in travel with global scale
- ✓ Recurring revenue from sticky hotel/airline clients
- ✓ GenAI marketing copilot is emerging growth driver

Key Risks

- Travel sector cyclicity exposure
- Integration risks from multiple acquisitions
- Small scale in global context vs Amadeus/Sabre

TELECOM AI ENABLERS

5G networks are the delivery pipes for AI applications. Telecom companies are evolving from connectivity providers to AI platform providers. India's 5G rollout creates a unique AI + telecom convergence opportunity.

Bharti Airtel (BHARTIARTL | NSE)

Large Cap
~₹8,50,000 Cr

BUY

AVG: 4.4/5

Business + AI Thesis

India's largest telecom by revenue. Heavy AI investments for network optimization, customer AI, and enterprise AI solutions. Aggressive 5G rollout across India.

5G network becomes AI delivery infrastructure. Airtel AI platform for enterprises. Network AI enables self-optimizing 5G. The pipe AND the AI become inseparable – Airtel owns both.

Key Strengths

- ✓ 5G + AI convergence – unique strategic position
- ✓ Enterprise AI monetization already underway
- ✓ Consistent long-term compounding story

Key Risks

- Capital intensive – 5G + AI capex is heavy
- Not a pure AI play – telecom is the core
- Jio competition constrains pricing power

Reliance Industries (RELIANCE | NSE)

Large Cap
~₹16,00,000 Cr

WATCHLIST

AVG: 3.9/5

Business + AI Thesis

India's largest conglomerate with major AI initiatives via Jio Brain platform, massive data center investments (\$20B+), and Meta partnership for Indian language AI.

Jio Brain AI platform + India's largest AI data center commitment. Meta Llama partnership creates Indian language AI moat. 500M+ Jio users = India's largest AI data flywheel.

Key Strengths

- ✓ Massive AI investment capacity at conglomerate scale
- ✓ Jio AI + Meta Llama partnership moat
- ✓ 500M+ user base = AI data flywheel

Key Risks

- Not pure-play – diverse conglomerate structure
- AI value not yet clearly monetized in financials
- Complex holding structure – hard to value AI piece

OVERALL	3.9	●●●●■

DEFENCE AI

India's defence AI spending is growing rapidly with increasing indigenization mandate. Counter-drone AI, radar AI, military simulation AI, and space AI are priority areas. Strong government order visibility.

Bharat Electronics (BEL) (BEL | NSE)

Large Cap
~₹2,00,000 Cr

BUY ON PULLBACK

AVG: 4.1/5

Business + AI Thesis

Navratna defence PSU. India's largest electronics company. Manufactures AI-powered radar, surveillance, communication, and battlefield management systems.

AI-powered defence electronics monopoly. AI radar systems, AI surveillance, drone swarm AI, battlefield AI. As India's defence AI budget grows, BEL is the primary and overwhelmingly dominant beneficiary.

Key Strengths

✓ Defence AI monopoly position in India

✓ ₹70,000+ Cr order book – 4+ years visibility

✓ Government defence budget expansion secular tailwind

Key Risks

■ PSU execution pace constraints vs private sector

■ Stretched valuation already prices in strong growth

■ Private sector defence competition increasing

Zen Technologies (ZENEC | NSE)

Small Cap
~₹5,000 Cr

WATCHLIST

AVG: 4.0/5

Business + AI Thesis

Defence simulation and training solutions. AI-powered military simulation systems, counter-drone AI systems (PELICAN), and combat training simulators.

Counter-drone AI market is growing exponentially post-Ukraine conflict. Zen's AI-powered anti-drone systems are export-grade. Military simulation AI creates recurring training contracts. Rare pure-play AI + Defence company.

Key Strengths

✓ Counter-drone AI leader in India + export markets

✓ AI military simulation = recurring MoD contracts

✓ Strong order book with Ministry of Defence

Key Risks

■ Low daily liquidity (~₹10–15 Cr/day)

■ Government procurement cycle unpredictability

■ Small company concentration and execution risk

Data Patterns India (DATAPATTNS | NSE)

Small Cap
~₹8,000 Cr

WATCHLIST

AVG: 3.6/5

Business + AI Thesis

Defence and aerospace electronics company. Products include avionics, radar electronics, and space electronics for DRDO, ISRO, and Indian defence agencies.

AI-embedded defence electronics: radar AI, missile guidance AI, satellite AI. Space + Defence + AI triple play. ISRO's growing program provides strong order pipeline. Rare listed Space economy + AI play.

Key Strengths

- ✓ Space + Defence + AI unique intersection listing
- ✓ High EBITDA margins (>30%) for defence electronics
- ✓ Import substitution in mission-critical electronics

Key Risks

- Lumpy order execution creates revenue volatility
- Low daily trading liquidity
- Dependent on government defence/space budget cycles

MTAR Technologies (MTARTECH | NSE)

Small Cap
~₹3,500 Cr

WATCHLIST

AVG: 2.8/5

Business + AI Thesis

Precision engineering for space, defence, nuclear, and clean energy. Manufactures precision components for rockets, missiles, and nuclear power systems.

Precision manufacturing for AI-enabled defence + space systems. Bloom Energy partnership for fuel cells – a critical power source for AI data centers (backup + primary). Space economy beneficiary.

Key Strengths

- ✓ Space launch + Defence precision play
- ✓ Bloom Energy fuel cell = AI data center power angle
- ✓ High technical moat in precision engineering

Key Risks

- Indirect AI connection – not core AI company
- Low liquidity, high stock volatility
- Revenue concentration in few key customers

Based on the 8-rule evaluation framework, these companies score highest on the combination of AI theme strength, chart quality, liquidity, and relative performance. All technical signals must be confirmed with real-time charts before entering any position.

#1 Persistent Systems	PERSISTENT	Large Cap	AI-First IT Services	BUY ON DIP	Score: 4.5/5
Why This Stock? India IT sector's fastest growing company. SASVA GenAI platform creates productivity moat. Every GenAI services deal flows to Persistent. Buy any meaningful 10–15% dip from highs. Entry Strategy (verify with real-time chart) Look for VCP or flag base formation. Ideal entry near 21-week EMA. Avoid buying at all-time highs without consolidation.			Investment Horizon & Target 5-year conviction hold. Next re-rating when AI services reach 30%+ revenue. Score Visual ●●●●■ 4.5/5		
#2 Bharti Airtel	BHARTIARTL	Large Cap	5G + AI Convergence	BUY	Score: 4.5/5
Why This Stock? 5G network becomes the AI delivery infrastructure of India. Airtel owns both the pipe and the enterprise AI platform. Consistent compounder with improving ARPU and AI monetization. Entry Strategy (verify with real-time chart) Breakout from multi-month consolidation on volume confirmation. Flag patterns are common. EMA 8 > EMA 21 maintained in strong uptrend.			Investment Horizon & Target 2–3 year hold. Monetization of enterprise AI = re-rating catalyst. Score Visual ●●●●■ 4.5/5		
#3 Coforge	COFORGE	Large Cap	AI-Led Digital Transformation	BUY	Score: 3.9/5
Why This Stock? Aggressive AI capability buildout via CIGNITI acquisition. Strong deal momentum in BFSI. Management credibility high. Improving margins + AI service differentiation = quality compounder. Entry Strategy (verify with real-time chart) After consolidation from breakout. Cup & Handle formation typical. Volume confirmation on breakout from base critical.			Investment Horizon & Target 2–3 year hold. Margin expansion from AI services premium pricing. Score Visual ●●●●■ 3.9/5		
#4 Dixon Technologies	DIXON	Large Cap	AI Device Manufacturing	BUY ON PULLBACK	Score: 4.1/5
Why This Stock? Every AI phone, AI PC, and AI TV manufactured in India passes through Dixon. PLI supercharges growth. Apple ecosystem entry is transformational. Structural multi-year volume story. Entry Strategy (verify with real-time chart) Pull back to 21-week EMA or flat base. Avoid buying after strong gap-ups without base.			Investment Horizon & Target 3–5 year hold as India becomes global AI device manufacturing hub. Score Visual ●●●●■ 4.1/5		

#5 Affle India

AFFLE

Mid Cap

AI Mobile Marketing Platform

BUY

Score:
3.9/5

Why This Stock?

Proprietary CPCU AI model is a genuine technology moat. As mobile commerce in emerging markets accelerates, Affle's AI-powered platform compounds. Global expansion adding revenue.

Investment Horizon & Target

3–4 year hold. 30%+ revenue growth CAGR with margin expansion.

Entry Strategy (verify with real-time chart)

VCP or flag breakout with volume. Entry near 21-week EMA in uptrend context is ideal.

Score Visual

●●●●■

3.9/5

#6 Zomato

ZOMATO

Large Cap

AI-Powered Quick Commerce

BUY ON DIP

Score:
4.4/5

Why This Stock?

AI is the moat, not just a feature. Route optimization AI, demand forecasting AI, and personalization AI compound over time. Blinkit quick commerce is the next major growth vector. Profitability achieved = re-rating from growth to quality compounder.

Investment Horizon & Target

5-year conviction hold for India's AI-powered consumer commerce leader.

Entry Strategy (verify with real-time chart)

Buy meaningful dips (10–20% corrections). Flat base or Cup & Handle structures. Never chase 20%+ gap-ups.

Score Visual

●●●●■

4.4/5

#7 Kaynes Technology

KAYNES

Mid Cap

Semiconductor + Electronics Manufacturing

BUY ON PULLBACK

Score:
4.1/5

Why This Stock?

First Indian OSAT facility + IoT/AI hardware manufacturing. Intersection of India's semiconductor ambitions and AI hardware demand. High growth visibility from order book.

Investment Horizon & Target

3–5 year hold as OSAT facility ramps up operations.

Entry Strategy (verify with real-time chart)

Pull back to 50-day MA or flat base. OSAT news can create sharp gap-ups — wait for base.

Score Visual

●●●●■

4.1/5

#8 Newgen Software

NEWGEN

Mid Cap

AI Process Automation

BUY ON PULLBACK

Score:
4.1/5

Why This Stock?

Consistent 25%+ revenue growth with AI embedded in sticky BPM products. SaaS transition drives valuation re-rating. 500+ global BFSI clients = deep moat.

Investment Horizon & Target

3–4 year hold as SaaS revenue crosses 50% of total.

Entry Strategy (verify with real-time chart)

Breakout from long consolidation with volume. Low daily liquidity requires patience — use limit orders. Not suitable for large position sizes.

Score Visual

●●●●■

4.1/5

Segment	Compani es	Avg Score	Assessment
AI Infrastructure & Data Centers	4	3.5	Structural long-term play; needs patience for execution
Semiconductor & Electronics Manufacturing	5	3.6	Multi-year winner; volatile short-term
IT Services & Cloud AI (Large Cap)	5	3.9	Safe AI exposure; growth differentiation matters
IT Services & Cloud AI (Mid/Small Cap)	4	3.3	Higher growth but verify liquidity & momentum
AI Applications & Platforms	6	3.9	Strongest AI moats; wait for correct entries
Telecom AI Enablers	2	4.2	Steady compounder; AI monetization is the re-rating trigger
Defence AI	4	3.6	Strong government visibility; illiquidity of small caps is key risk

MINI NOTES

- ✔ Risk management matters most — position size based on conviction and liquidity
- ✔ Avoid emotional entries — wait for proper base formations (VCP, Cup & Handle, Flat Base)
- ✔ Great setups are usually obvious — if the chart looks messy, it probably is
- ✔ Combine this report with real-time technical analysis before any trade execution
- ✔ Diversify across segments — infrastructure, applications, and services to balance risk

NOT INVESTMENT ADVICE	<i>This report is prepared purely for educational and research purposes. Nothing in this document constitutes investment advice, a recommendation to buy or sell any security, or a solicitation to invest in any financial instrument. Always consult a SEBI-registered investment advisor before making investment decisions.</i>
DATA & ACCURACY	<i>Company descriptions, AI positioning, and qualitative scores are based on publicly available information and research analysis. Market cap figures are approximate. Financial data may have changed since the time of writing. Always verify with the latest annual reports, quarterly results, and stock exchange filings before any investment decision.</i>
TECHNICAL ANALYSIS CAVEAT	<i>Scores for Uptrend, Volume, Chart Structure, and Entry Signal are framework guidelines only. These require real-time chart verification using live market data, current EMAs, volume profiles, and actual price patterns. A score of 4–5 does not mean the stock is in a valid technical setup today.</i>
PAST PERFORMANCE	<i>Past stock performance does not guarantee future returns. AI sector stocks can be highly volatile and subject to rapid valuation changes based on technology shifts, competitive dynamics, and macroeconomic factors including interest rates, currency movements, and global tech sentiment.</i>
RISK MANAGEMENT	<i>Never invest more than you can afford to lose. Use stop-losses. Diversify across sectors and market caps. Small-cap and mid-cap stocks in this report may have significantly lower liquidity than large-caps — position sizing must account for this. Illiquid stocks can cause significant slippage on entry and exit.</i>
METHODOLOGY	<i>The 8-rule evaluation framework used in this report is adapted from a visual checklist for stock selection based on trend, volume, and chart structure principles. Scores are assigned qualitatively (1–5 scale) based on the author's assessment of each criterion for each company. Different analysts may reach different conclusions using the same framework.</i>
